CERTIFICATE OF COMPLETION

This is to certify that ATTIA has completed her ACCP 1st Semester (CPISM) E-Project.

Submitted to: Aptech Computer Education

On

April -25-2026

ACKNOWLEDGMENT

“A quick and responsive approach with a friendly working environment, along with a consistent pace, is what the world demands from IT professionals today. However, in situations like the present, busy schedules and remote or abstracted locations often become barriers, causing delays in project submissions. This has encouraged me to explore more effective alternatives to demonstrate my efficiency and commitment.

I would like to acknowledge all those who provided moral support and contributed to the successful completion of this project.

I would also like to express my sincere gratitude to my teacher, Hammad Hassan, for his valuable guidance, constant supervision, and for providing the necessary information throughout the project.

Furthermore, I extend my heartfelt thanks to the E-Project Team at the Aptech Head Office for their support.”

ABRIDGEMENT

“I worked on this project for almost a week to ensure its successful completion. During this period, I encountered several unpredictable challenges, which enhanced my understanding of coding errors and their solutions. Although I faced difficulties at certain stages, I remained persistent and ultimately achieved the final outcome of the project.”

PROBLEM STATEMENT

“Cera’s is an organization selling entire range of ceramic tiles and related products . They provide variety of tiles suitable for each and every kind of construction starting from office to home and etc.

You are supposed to create a website for them with the below mentioned requirement specifications.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.”

Requirement Specification:

The website is to be created based on the following requirements:

- *The Home Page should be created making use of Sections with a suitable logo, the header section can be added which will show images of various furnishing products.*
- *The site must contain the links to navigate through any category for the information.*
- *The site should display a menu which will contain following categories of tiles.*

- **Wall tiles**

- *Bathroom wall tiles*
- *Kitchen wall tiles*
- *Outdoor wall tiles*
- *Living room*
- *Bedroom*
- *Commercial spaces tiles*

- **Floor tiles**

- Bathroom floor tiles
- Kitchen floor tiles
- Outdoor floor tiles
- Livingroom
- Bedroom
- Commercial space tiles

- **Special tiles**

- **Germ-free:** a selected range of Tiles and Kitchen Countertops with the Anti-Bacterial and Anti-Viral Advantage
- **Tac:** Tactile are unique non-fade, non-slip ground surface indicators (vitrified tiles). These indicators provide cues, which combined with other environmental information, assist visually challenged people with their orientation.
- **Anti-static :** the industrial tiling solution that has looked into a very niche but highly important areas, which are sensitive to static electricity.
- **Cool-roof:** tiles, a range of unique tiles that keeps the harsh rays of the sun off your building. Recommended laying for terrace, balcony, and courtyard and beat the heat inside your home and save & energy.

- There should be e-catalogue available for download which should include complete details of entire range of tiles like.
 - i. Glazed vitrified tiles
 - ii. Ceramic tiles
 - iii. Polished vitrified tiles
- Each menu option mentioned above should have sub categories according to the range of products available in that category.
- A brief summary of features of the products should be displayed on the We Page along with the picture but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.

- *The user should also be able to compare the various products of different types of tiles .*
- *There should also be a section “Expert corner” where blogs, tile guide, educational videos, tiles calculator etc. should be available as ready reference for buyers.*
- *There should be a “Contact Us” page which will have the Address of the Company which should be displayed using GeoLocation API (eg. GoogleMaps) and the email address which when clicked will invoke the local mail client from where they can send an e-mail .*

Hardware/ Software Requirements

➤ Hardware

- *A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better*
- *64 Megabytes of RAM or better.*

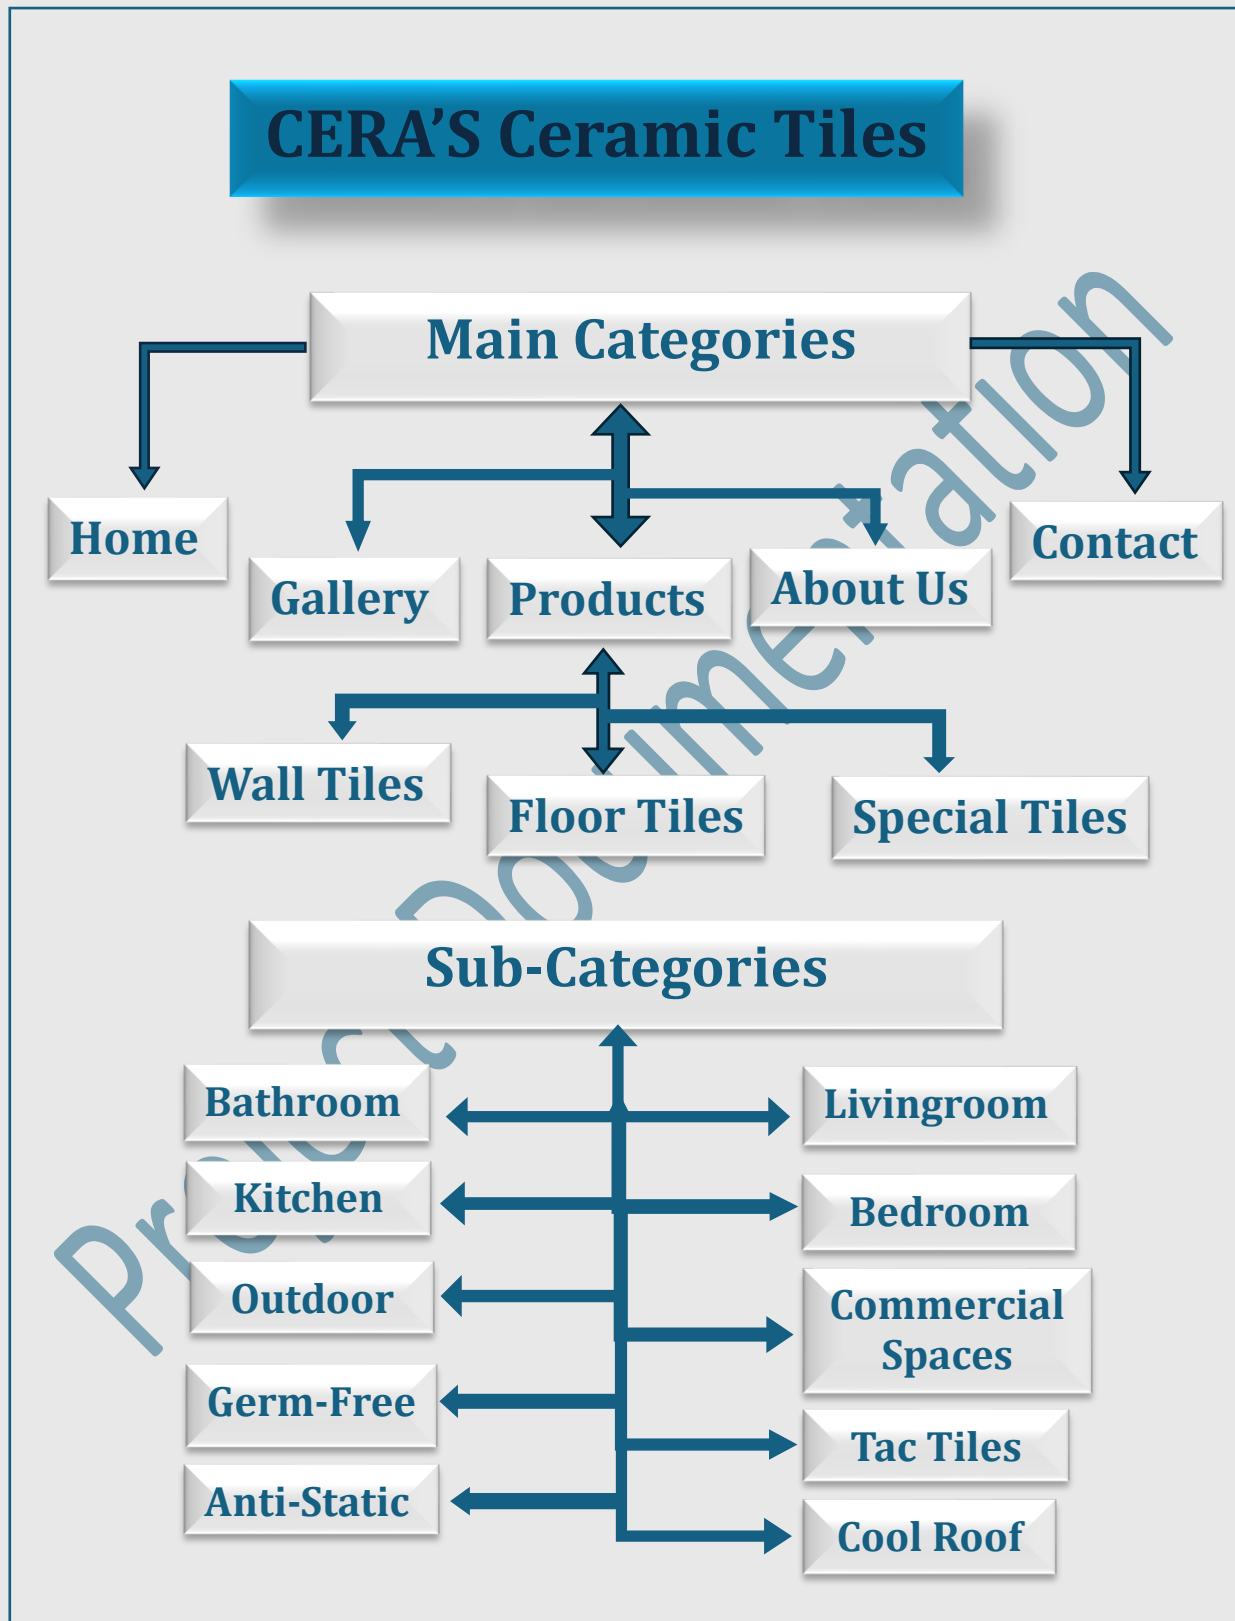

➤ Software *[Either or Combination as per Course/Sem]*

- *Notepad/HTML editor*
- *Dreamweaver*
- *IE 5.0/ Netscape 6.0*

Architecture and Design of the System DEVELOPERS GUIDE

“Using HTML, CSS, BOOT-STRAP and JAVA-SCRIPT on this project was a very convenient yet a simple way to express our creativity in different sorts of manner. This website is based on various classes and ids set in a consecutive manner with suitable names and a very readable coding structure so it could be smooth to understand it and make changes if necessary.”

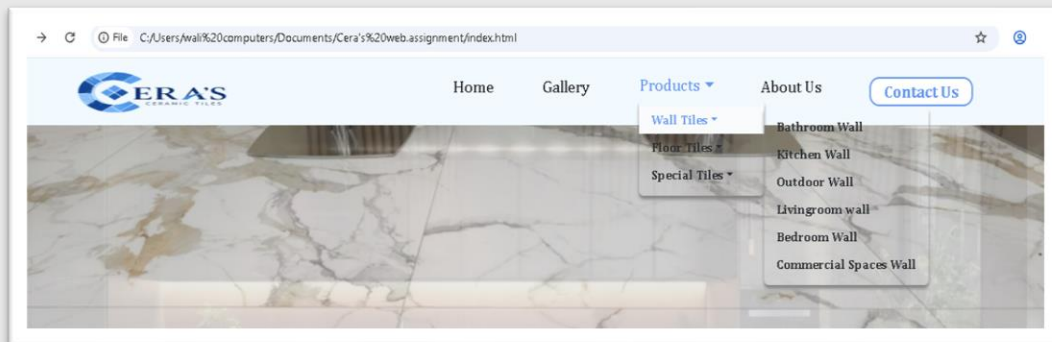

SITE map

USER GUIDE

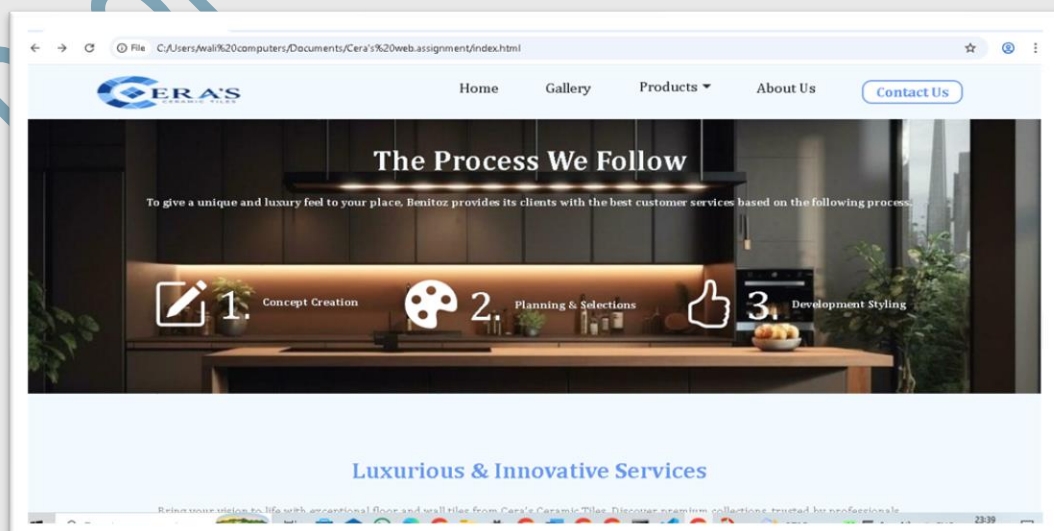

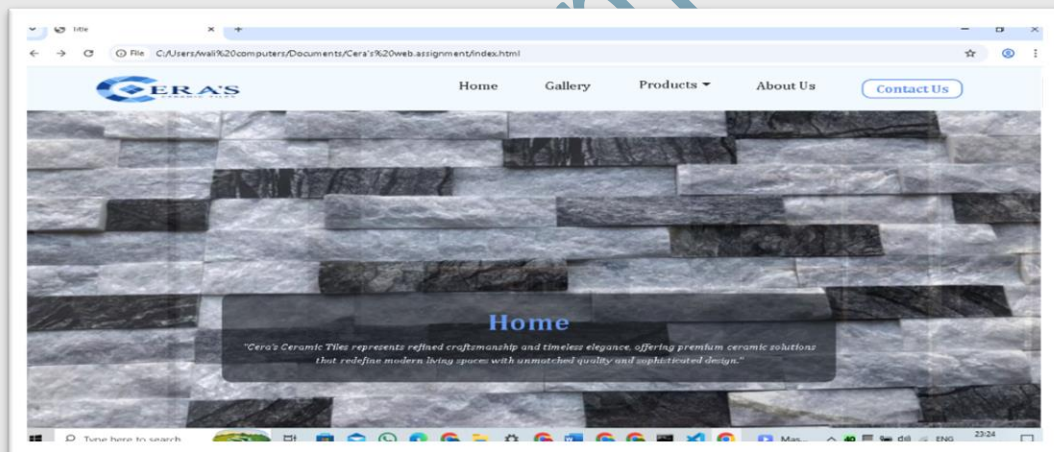

NAVIGATION BAR

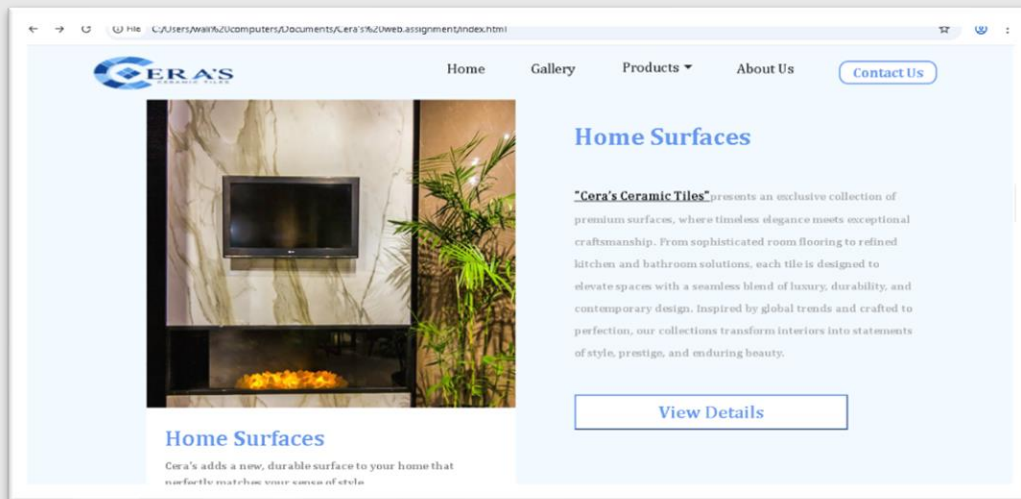

"The navigation bar is the host of the website which will help you explore the rest of the site. There are some of the options like Home, Gallery, Athletes, News, FAQs & Contact us page each of them which leads to another side of our project."

HOME

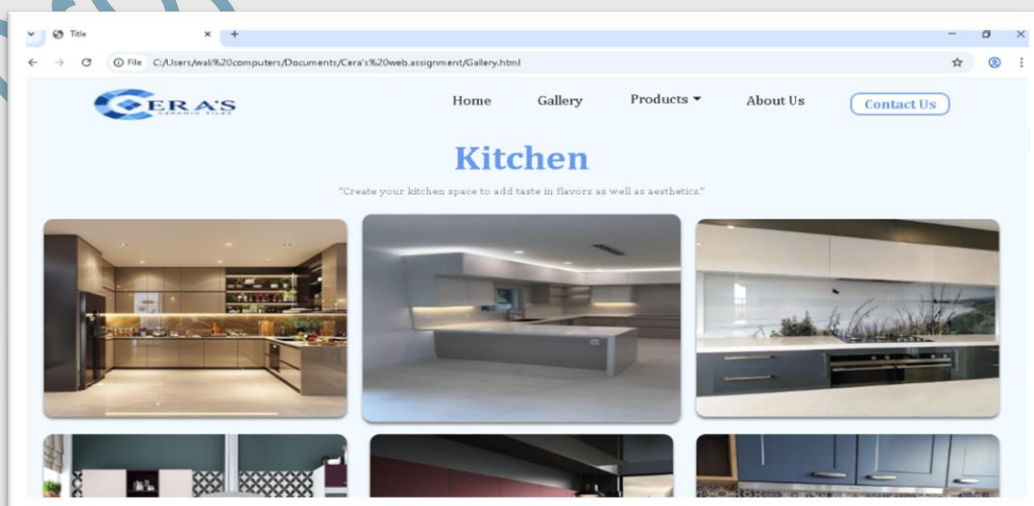

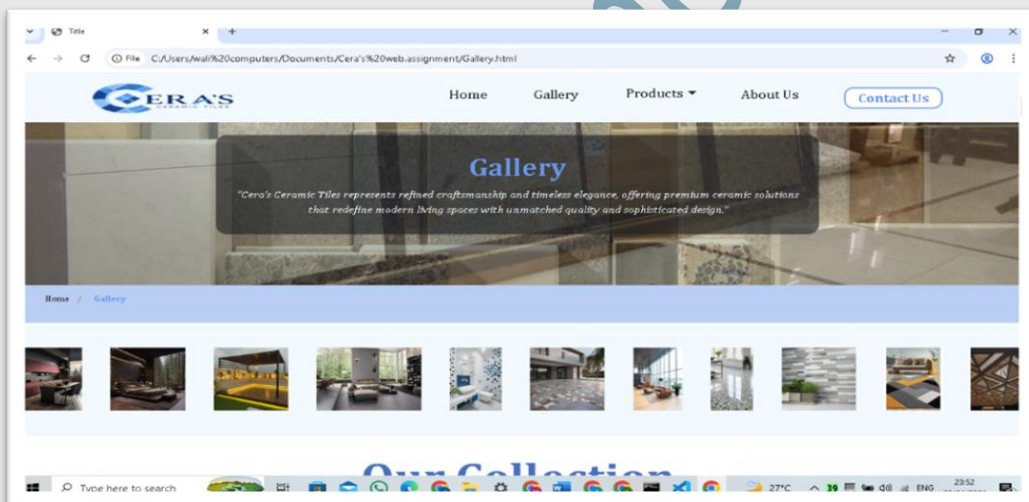

"Home page is a main page of the website or could be termed as the introductory page containing some of our information and navigation bar at the top working as a gateway to other pages of the site."

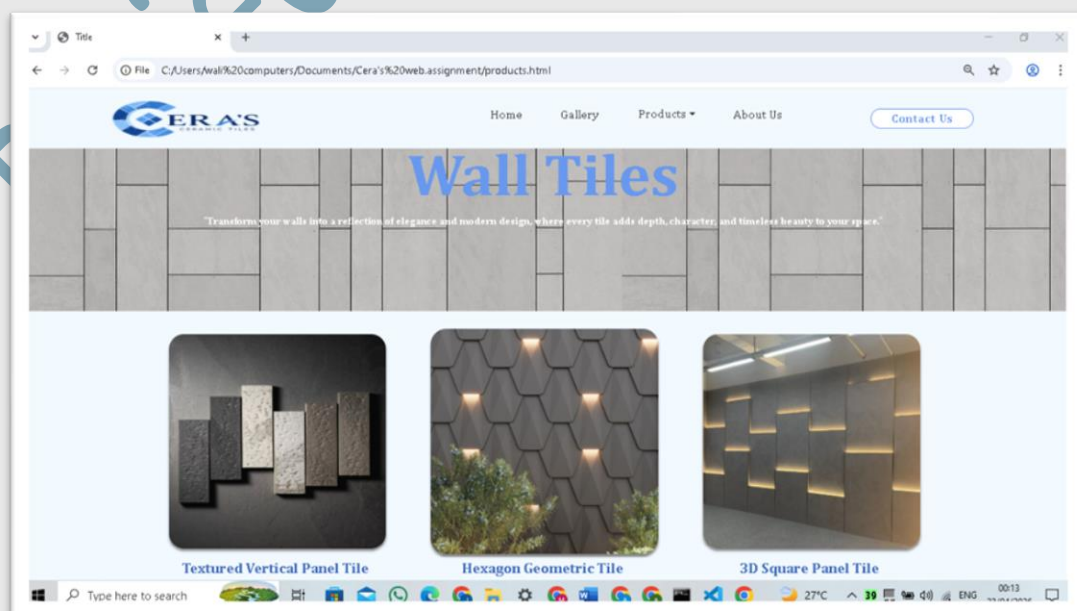

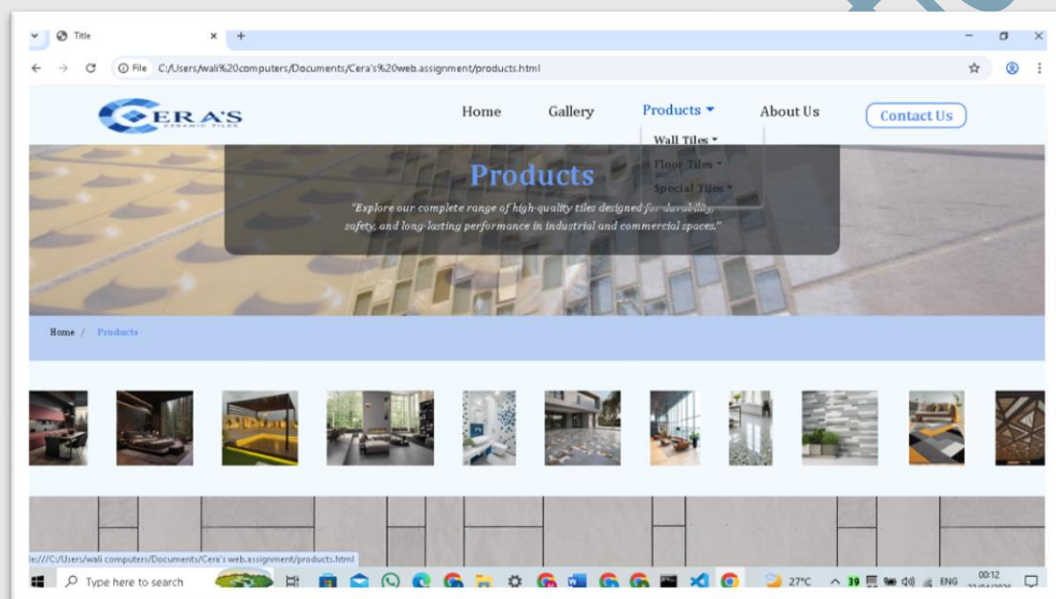

GALLERY

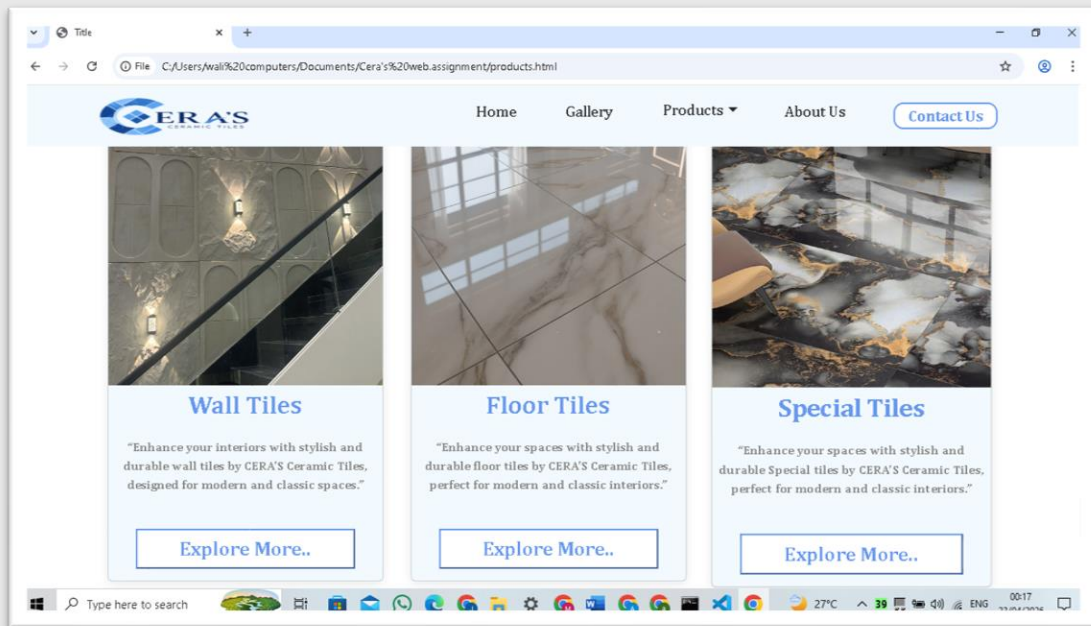

"Our first gallery — Introduction to the Games — starts at the beginning of the Olympic and Paralympic movements, nearly 3,000 years ago. You will learn about the ancient Olympics as well as the origins of the modern Olympic and Paralympic Games."

Products

“Cera Tiles is a well-known brand that provides high-quality ceramic and vitrified tiles for different types of spaces. The company offers a wide range of products including wall tiles, floor tiles, and special tiles designed for both residential and commercial use. These tiles are available in various designs, sizes, and finishes to meet modern interior and exterior requirements. The products are known for their durability, aesthetic appeal, and advanced features such as anti-bacterial, anti-static, and heat-resistant properties, making them suitable for a variety of applications.”

CONTACT US

"In this page, we add our e-mail, or other personal information that enables other users to get a hold of someone."
